**OrbusNeich appoints Scott J Addonizio as Senior Vice President,
Global Operations**

Role to support company's continued growth and advanced product design

HONG KONG, [31 March 2015] – OrbusNeich, a global company specializing in innovative vascular devices, today announced the promotion of Scott J Addonizio to Senior Vice President, Global Operations. Mr Addonizio's new role will extend his responsibility to overseeing operations at the company's state-of-the-art manufacturing facilities in Hoevelaken, Netherlands, in addition to Shenzhen, China, which has been his focus for the past 10 years. Together, these facilities are the manufacturing flagship for the company's extensive portfolio of high performance stents and balloons, including the COMBO Dual Therapy Stent – the world's first dual therapy stent, launched in 2013.

"I am delighted to announce Scott's promotion to Senior Vice President, Global Operations," said B. Wayne Johnson, President and Chief Executive Officer, OrbusNeich. "Under Scott's leadership, our Shenzhen operations have grown exponentially. His contribution to building our world-class capabilities has been enormous. We believe that Scott's operational experience and broad knowledge of different business cultures will be critical as we continue to develop medical device solutions for the global market."

Mr Addonizio began his career as a design engineer working for Boston Scientific and as an industrial design engineer for Cordis Endovascular. He joined OrbusNeich as a project manager in 1998 and is the primary patent holder for the "stent having dual helical design", which serves as the backbone for all OrbusNeich stent platforms. In 2005, Mr. Addonizio

relocated to Shenzhen, China to manage the Shenzhen operations and has immersed himself in the language, customs and business culture of China.

“I am honored to accept the role of Senior Vice President, Global Operations and am very excited by the possibilities which lie ahead for OrbusNeich as we look to further cement our reputation as a global provider of high quality innovative medical devices for the treatment of vascular disease,” said Mr Addonizio.

“With a keen focus on intellectual properties and an emphasis on growing our R&D capabilities, we are in a strong position to continue to achieve excellence and extend our market presence. I welcome this challenge and am privileged to be at the forefront of our efforts to provide physicians with state of the art devices.”

Mr Addonizio’s appointment follows the recent naming of Mr Alain Aimonetti as OrbusNeich Vice President Global Marketing and EMEA Sales.

About OrbusNeich

OrbusNeich is a global company that designs, develops, manufactures and markets innovative medical devices for the treatment of vascular diseases. Current products are the world's first dual therapy stent, the COMBO Dual Therapy Stent, and the world’s first pro-healing stent, the Genous™ Stent. Other products include stents and balloons marketed under the names of Azule™, R Stent™, Scoreflex™, Sapphire™, Sapphire™, II and Sapphire™ II NC. OrbusNeich is headquartered in Hong Kong and has operations in Shenzhen, China; Fort Lauderdale, Fla.; Hoewelaken, The Netherlands; and Tokyo, Japan. OrbusNeich supplies medical devices to interventional cardiologists in more than 60 countries. For more information, visit www.OrbusNeich.com.
