

12<sup>th</sup> December 2020

# Diamondback 360 coronary orbital atherectomy system for the management of severely calcified lesions

**Saturday 12<sup>th</sup> December | 15:20-16:05**

Chairperson: Prof Michael Haude

Operators: Dr Albert Alahmar - Dr Sulaiman Al-Habib hospital  
Dr Wael Aboushokka - Al Quassmi hospital

## Join our session at GulfPCR-GIM:

- To see the optimized outcomes of the orbital atherectomy system for severely calcified coronary lesions
- To understand how the orbital atherectomy can fit into the daily practice within calcified coronary lesions
- To learn more about the integrated approach to PCI in coronary calcified lesions

Session objectives and introduction

M Haude

Management of severe calcification in the left main stem

A Alahmar

Discussion

Managing complex calcified coronary artery disease

W Aboushokka

Discussion

Session evaluation and key learnings
