

10th Edition CLI-C GLOBAL 2026

8-10 April 2026 | Venezia Terminal Passeggeri, Venice, Italy

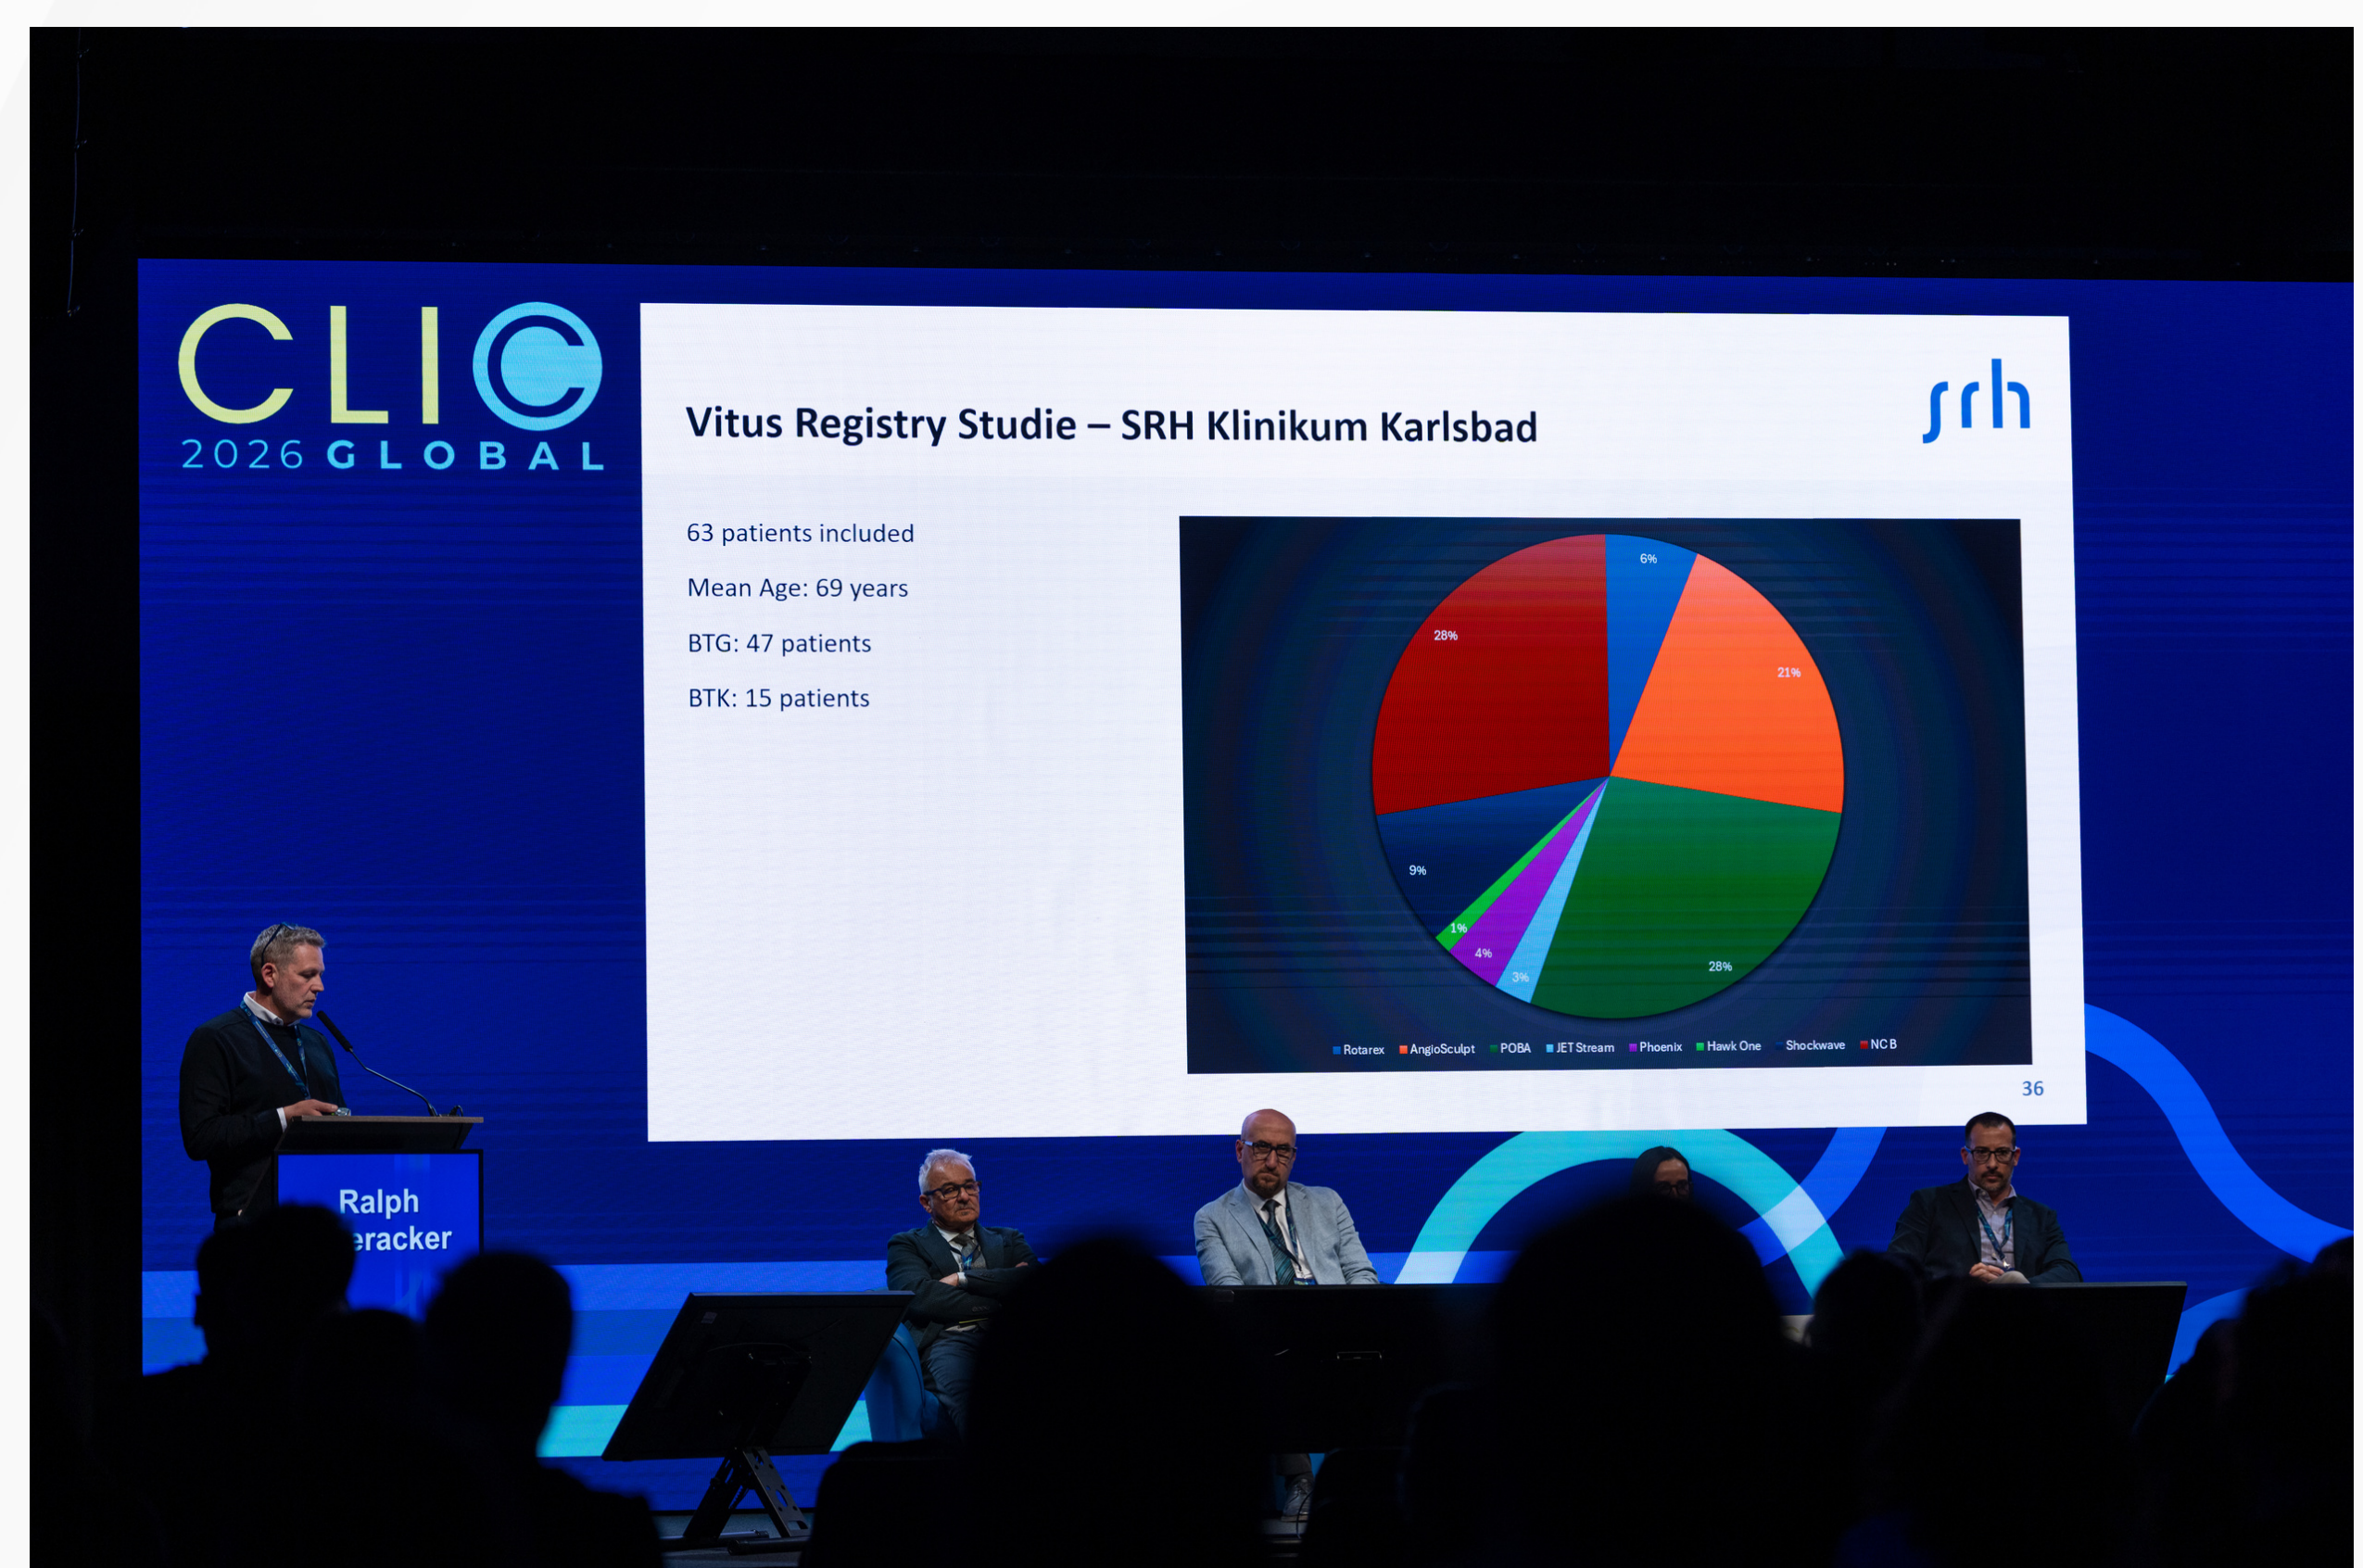

Overview

OrbusNeich® participated in the 10th Edition of the CLI-C Global 2026, held in Venezia Terminal Passeggeri, Venice, Italy from April 8–10th. Throughout the event, our booth attracted a steady flow of visitors, reflecting strong interest in our peripheral portfolio—particularly JADE®, VITUS™, and Teleport® Glide.

Congress Highlights

- A key highlight was the positive reception of JADE® PLUS, now available with a 300 mm balloon length. Many professionals expressed strong interest in adopting it promptly, especially those currently using 200 cm catheters.
- During the his presentation, Dr. Ralph Oberacker highlighted the role of NC balloons like JADE® for effective lesion preparation and the low embolization risk of DCBs, such as VITUS™ Drug-Coated Balloon.
- Prior to the session, a live debate favored paclitaxel-coated DCBs by 2:1, with Dr. Ralph Oberacker noting stronger clinical evidence and highlighting VITUS™ as a paclitaxel-coated balloon.

VITUS™
Paclitaxel Coated PTA Catheter

JADE®
PTA BALLOON CATHETER

JADE® PLUS
PTA BALLOON CATHETER

Teleport®
Glide Microcatheter

The congress was a clear success for OrbusNeich®, strengthening brand visibility and reinforcing our presence among healthcare professionals, while generating valuable engagement and meaningful clinical discussions with physicians across key european markets.
