

IVUS CME: SonoScape V20 HD IVUS System

7 April 2026 | Institut Jantung Negara (IJN), Malaysia

Overview

A Continuing Medical Education session was successfully conducted for the Cardiovascular Technologist (CVT) team at Institut Jantung Negara, on 7th April 2026. Focusing on the SonoScape V20 HD IVUS System as part of an ongoing continuous learning initiative. The one-hour session aimed to enhance users' familiarity and proficiency with the system, which has already been in clinical use within the ICL department by reinforcing best practices and supporting more effective and optimized device utilization in daily procedures despite their prior exposure.

CME Highlights

- **Practical SonoScape V20 HD IVUS system training:** Focused on system features, handling, workflow optimization, and improving imaging efficiency.
- **Team competency emphasis:** Highlighted the importance of full team familiarity to ensure smooth workflow and effective procedures.
- The session also provided an interactive platform for users to revisit core functionalities, clarify operational questions, and share clinical experiences. This engagement supports improved confidence and consistency in SonoScape V20 HD IVUS system guided procedures.

V20
HD IVUS System

Overall, the session was well received and served as a valuable refresher, reinforcing the importance of continuous education to maximize clinical outcomes and ensure optimal use of advanced intravascular imaging technologies.
