

HKSVS 2026

The Hong Kong Society of Vascular Surgey Annual Scientific Meeting

16 May 2026 | Hong Kong

Overview

The Hong Kong Society of Vascular Surgery (HKSVS) Annual Scientific Meeting 2026 was successfully held on 16 May 2026 at the Marco Polo Hong Kong Hotel, bringing together leading vascular specialists, interventional experts, and healthcare professionals to exchange insights on the latest advancements in vascular and endovascular care.

The scientific program featured a series of engaging presentations and expert-led discussions focusing on contemporary treatment strategies and procedural innovations. Key topics included the **management of complex aortic dissections, radiation reduction techniques during FBEVAR procedures, and angiosome-directed revascularization approaches for chronic limb-threatening ischemia (CLTI).**

Meeting Highlights

OrbusNeich strengthened engagement with physicians and vascular specialists through interactive scientific exchanges and product-focused discussions during the meeting. The congress provided a valuable opportunity to **highlight the clinical applications and benefits of several key solutions from the company's endovascular portfolio, including:**

- JADE® 2 PTA Balloon
- JADE® PLUS PTA Balloon
- VITUS™ DCB
- Teleport® Glide Microcatheter

The meeting also enabled meaningful exchanges on evolving procedural needs and clinical challenges in vascular intervention, reflecting the continued importance of innovation, collaboration, and physician education in improving patient care outcomes.
