

2nd MICA Conference

Mekong Interventional Cardiology Conference 2026

16 May 2026 | Can Tho, Vietnam

Overview

OrbusNeich participated as a Silver Sponsor at the **2nd MICA Conference 2026** in Can Tho, Vietnam, together with our distributor partner, PT Medical Equipment Joint Stock Company, on 16 May 2026. Organized by the Mekong Interventional Cardiology Association (MICA), the conference gathered nearly 300 healthcare professionals and served as an important platform for scientific exchange and engagement within Vietnam's interventional cardiology community.

During the event, OrbusNeich and PT Medical hosted a booth to **showcase our coronary intervention solutions and engage directly with physicians and healthcare professionals on the latest developments in PCI treatment strategies.**

Conference Highlights

A key highlight of the conference was the OrbusNeich-sponsored scientific presentation titled **“Can DCB Replace Stents in the New Era?” delivered by Assoc. Prof. Dr Ho Anh Binh.** The session generated strong interest among attendees, with discussions centered on the evolving role of drug-coated balloons (DCB) in coronary artery disease treatment.

Dr. Binh shared valuable clinical perspectives on DCB therapy and introduced Support C™ as a treatment option in selected PCI cases, reinforcing the growing awareness and acceptance of DCB solutions within the Vietnamese interventional cardiology market.

“Can DCB Replace Stents in the New Era?”

Scientific Presentation by Assoc. Prof. Dr Ho Anh Binh

The 2nd MICA Conference 2026 provided a valuable opportunity for OrbusNeich and PT Medical to strengthen engagement with healthcare professionals, enhance brand visibility, and reinforce the growing presence of Support C™ within Vietnam's evolving PCI landscape.
