

PSU ENDOVASCULAR CONFERENCE 2026

20-22 May 2026 | Graceland Khaolak Beach Resort, Phang Nga, Thailand

Introduction

Our Thailand partner, HOSPICARE, recently participated in the 10th PSU Endovascular Conference 2026, held from May 20–22, 2026, in Khao Lak, Thailand.

This year’s conference, themed “Endovascular Frontier 2026: Beyond Standard Therapy,” brought together leading vascular surgeons and interventional specialists from across the globe to explore the latest advancements in endovascular treatments and innovative procedural strategies.

Joint Efforts and Shared Expertise

The intensive three-day scientific program served as a premier international platform for knowledge exchange and collaboration through highly interactive sessions, including:

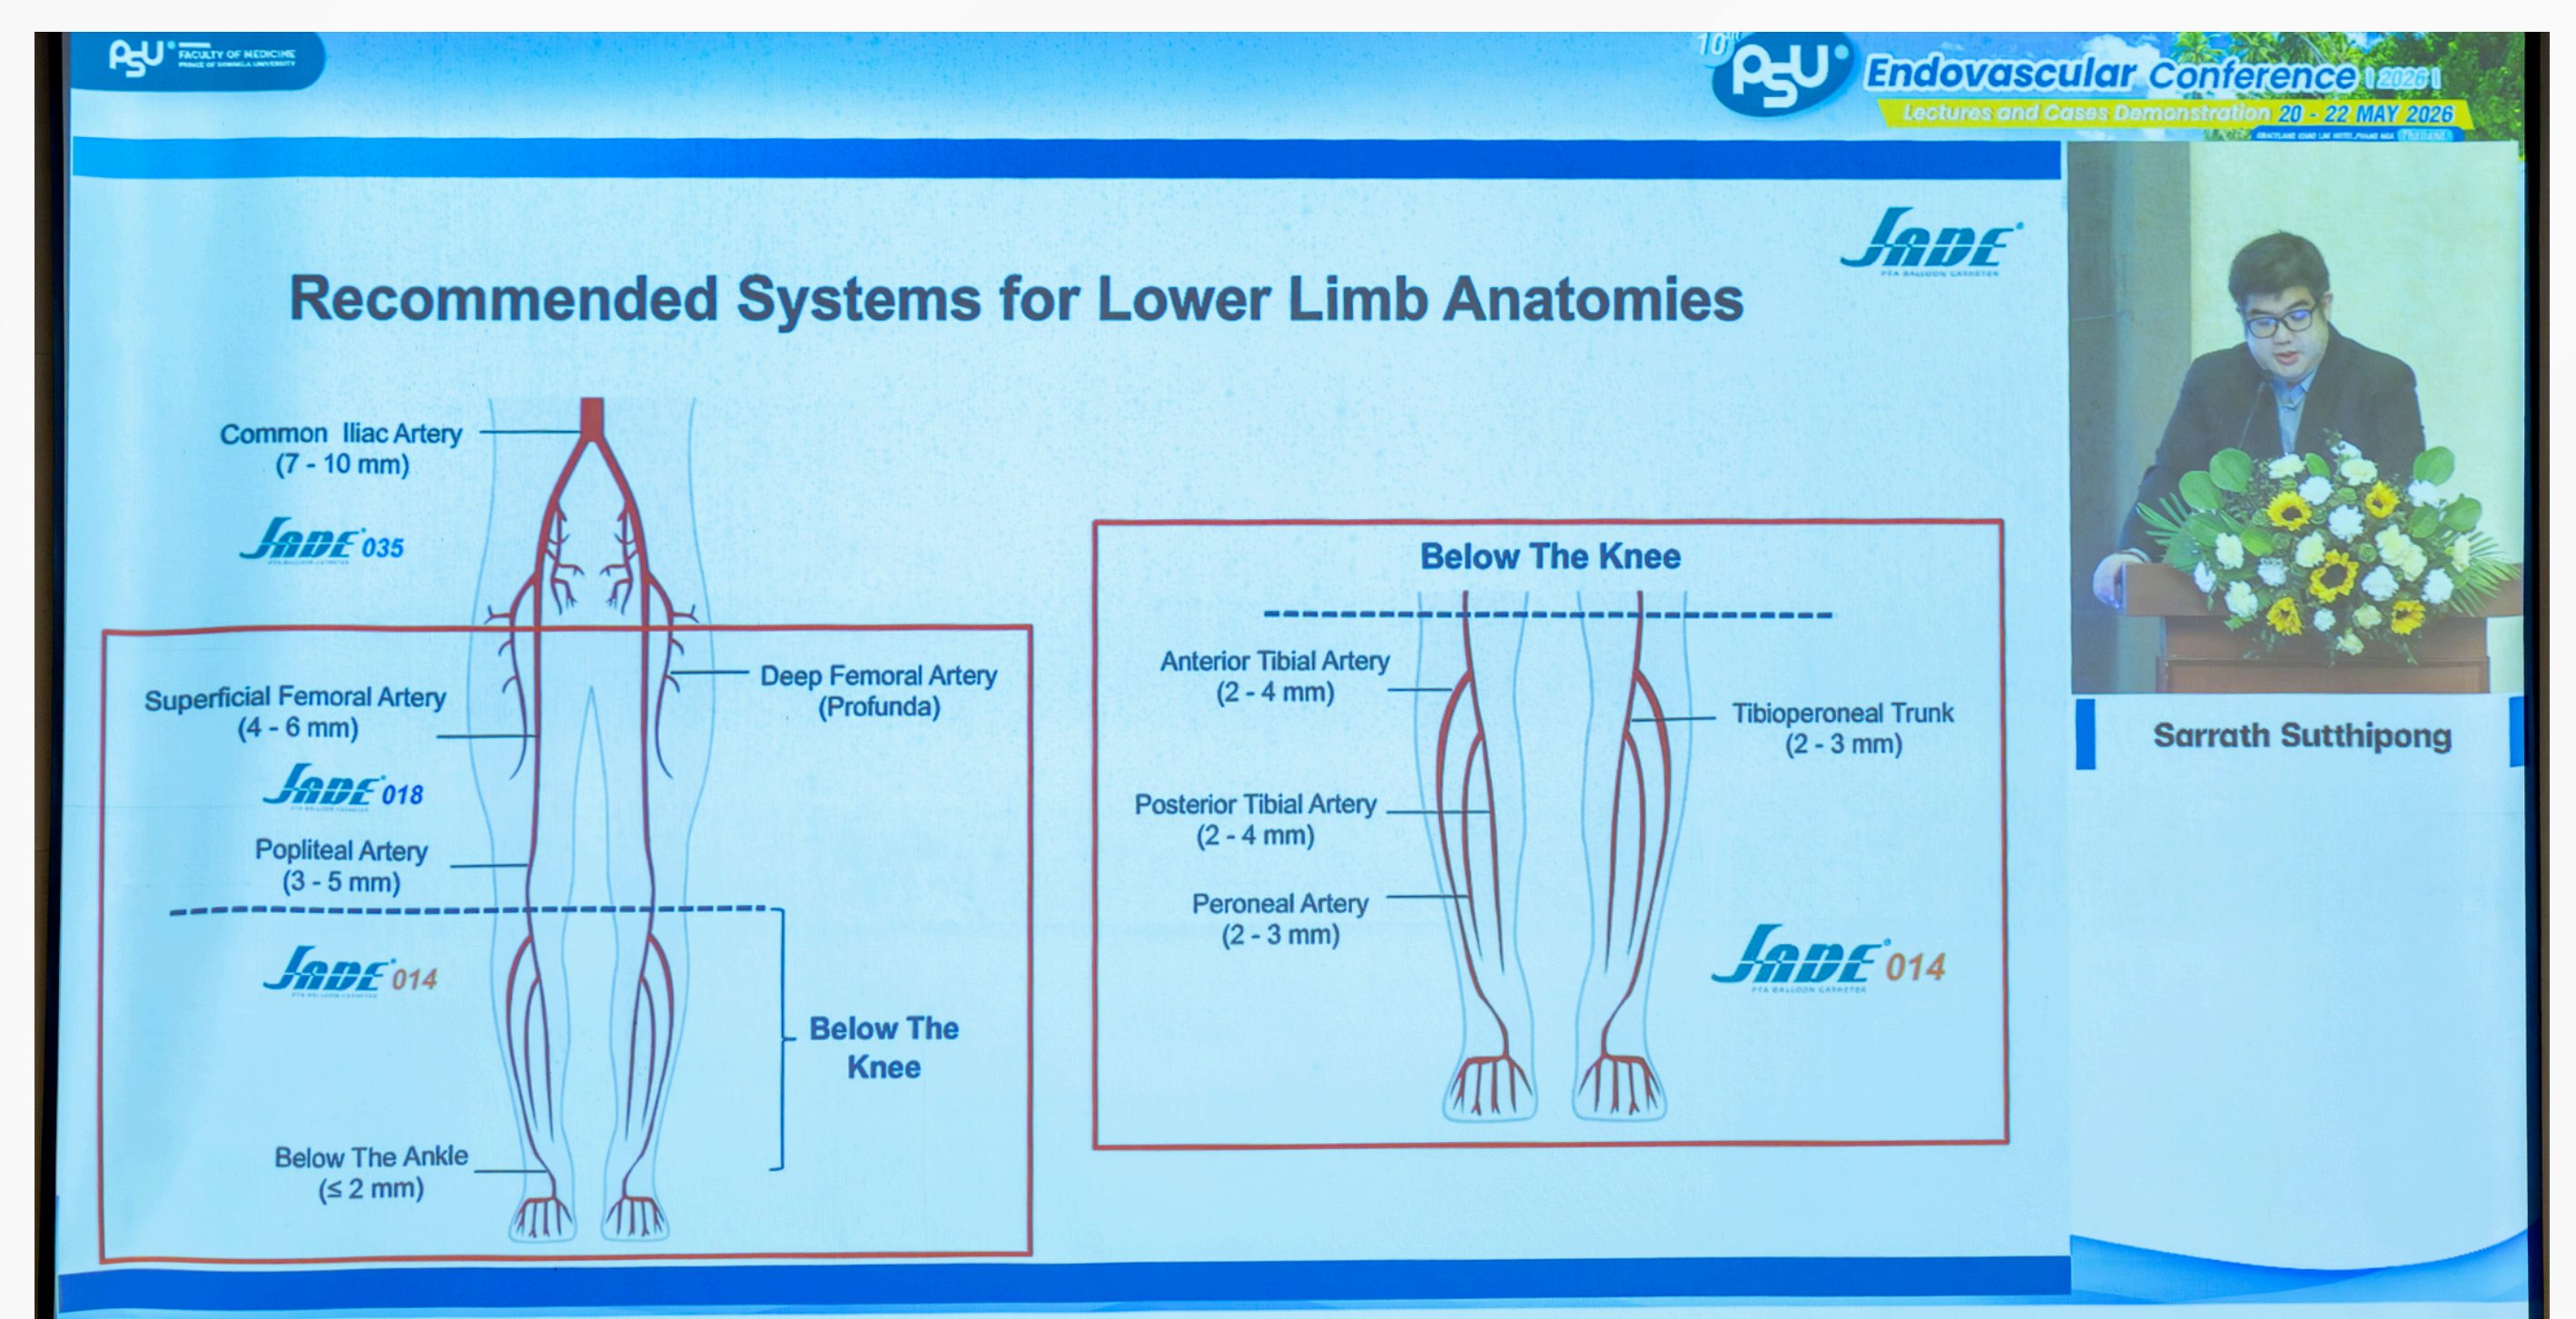

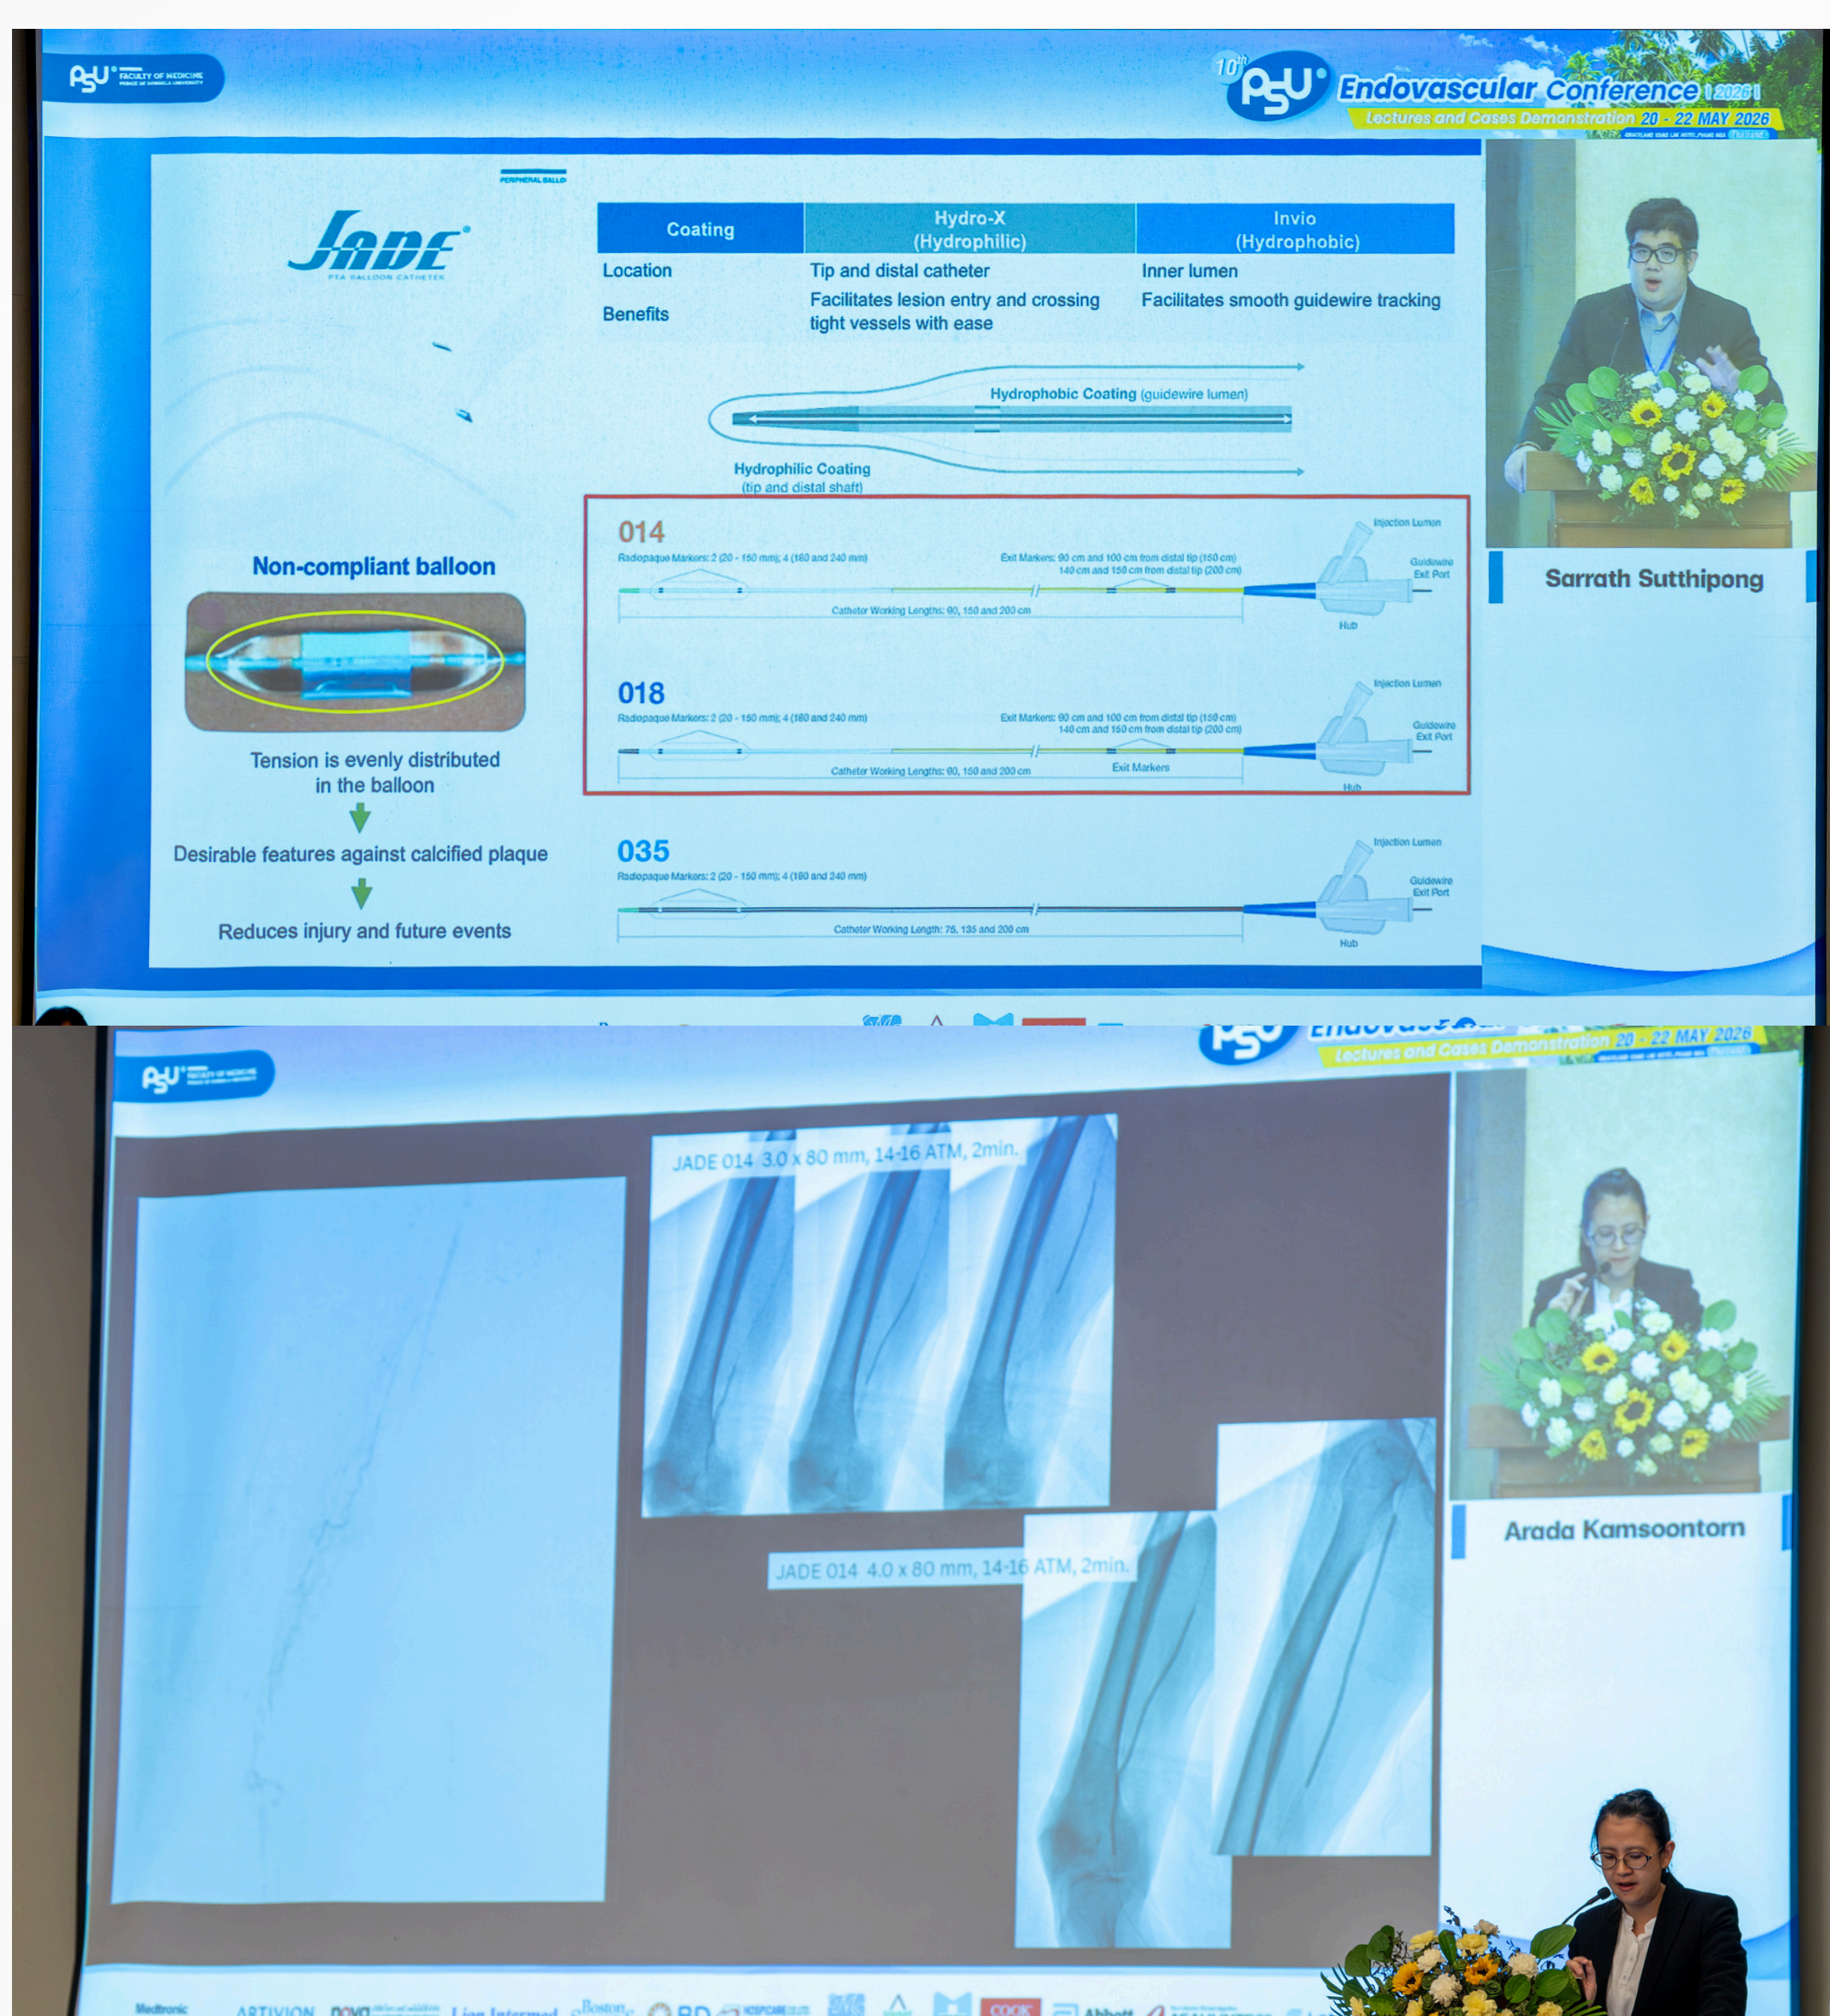

- **Live Case Transmissions** – Real-time broadcasts of complex EVAR procedures performed by the PSU Team
- **Case-Based Learning** – More than 23 highly technical case presentations featuring real-world clinical scenarios, challenging anatomies, and procedural outcomes
- **Global Collaboration** – Insights and experience shared by experts from the USA, Canada, South Korea, Vietnam, Malaysia, and Thailand

The conference provided an excellent opportunity to engage with key opinion leaders, exchange experiences, and discuss the evolving future of endovascular therapy beyond conventional treatment approaches.

JADE® in Practice

We are proud to share that JADE® was showcased in several clinical cases during the event, highlighting its role in supporting complex endovascular interventions.

We would like to extend our sincere appreciation to HOSPICARE and the PSU organizing team for delivering a successful and impactful event. Special thanks also to all the physicians who visited, provided their insights, and explored opportunities for cooperation. Your interest, support, and engaging discussions made the event truly meaningful.
