

ASEAN CTO 2026

8-9 August 2026 | S31 Hotel, Bangkok, Thailand

Introduction

ASEAN CTO 2026 was held from 8 to 9 August 2026 in Bangkok, Thailand, bringing together CTO specialists for scientific exchange and discussion. As a Platinum Sponsor, OrbusNeich participated alongside distributor partner Hospicare Co., Ltd., showcasing its coronary portfolio and launching Teleport® XT in Thailand.

Highlights

At the exhibition booth, Sapphire® 3, Sapphire® NC 24 and Scoreflex® TRIO were showcased alongside the newly launched Teleport® XT, generating interest and engagement among interventional cardiologists. The launch marked an important step in introducing Teleport® XT to the Thai market and highlighting its potential role in supporting complex CTO intervention.

Teleport® XT
Microcatheter

SAPPHIRE® 3
Coronary Dilatation Catheter

SAPPHIRE® NC 24
Coronary Dilatation Catheter

scoreflex® TRIO
Balloon Dilatation Catheter

On 8 August, Dr. Wasan Udayachalerm presented a “Managing CTO Challenges” case, featuring a challenging failed PCI case involving the distal RCA. The presentation demonstrated how Teleport® can help simplify CTO intervention by facilitating lesion crossing and providing support in complex cases. This was complemented by a live case from Police Hospital, where Dr. Anek Kanoksilp demonstrated the use of Teleport® XT in an RCA CTO case via a retrograde approach, providing practical insight into its application in complex CTO procedures.

By combining product introductions, clinical discussions and live demonstrations, ASEAN CTO 2026 provided a strong platform to establish awareness of Teleport® XT and demonstrate its clinical relevance. The event also strengthened collaboration with Hospicare and supported continued engagement with CTO specialists in the Thai market.
